VOLUME XVII. No. 6

EMPRESS, ALTA. THURSDAY, July 25, 1925

Price: \$2.00 Per Year.

United Church

The Church School, 10.30 a.m. Public Worship, 11.30 a.m. Service will be conducted by Mr. J. A. Houston B. A., of Acadia Valley. The services at the country appointments will be withdrawn until the return of your pastor on August 11. We invite you all to worship with us.

Rev. Geo. A. Shields, Minister.

Births

Born—To Mr. and Mrs. D. Lush, July 21, a daughter.

Born—To Mr. and Mrs. A. A. MacMillan, at the Irene Cottage Hospital, at Peace River, July 15, a daughter.

Rumsey Hit By Hail Storm

Rumsey, July 16—Hail damage reaching 100 per cent, was claimed following the storm July 10, destruction being mainly west of town. One horse belonging to Ralph Tolman and two belonging to C. W. Moore, were killed by lightning.

Owing to the 20 per cent. hail rate not a great deal of insurance was carried in the district. Flooding had begun on account of drought, and this storm will increase acreage to be plowed.

Len Northcott made a trip to Swift Current on Saturday.

Disastrous Fire At Wainwright

A disastrous fire ravaged the town of Wainwright on Sunday. Starting from a barn and fanned by a seventy mile an hour gale, the town was practically destroyed, excepting five business places. The loss is placed at \$1,000,000; it is expected that considerable time will elapse before the town is built up again to its pre-fire status. The heat from the burning buildings was so intense that a number of autos were left on the streets where they had been parked and were eventually destroyed.

Still A Golf Enthusiast

A letter received advises us that Bill Grosche still follows the old golf ball. For his district in the Manitoba Free Press competition, on the Newdale course Bill scored an 86, being beaten by Dr. Clark with an 84 for the honour of representing the district.

Scots Progress in Adult Education

Glasgow—Provision for adult education in the West of Scotland will soon be on a scale comparable with that in England. This is mainly due to the formation of the West of Scotland Joint Committee on Adult Education, of which Sir Donald MacAlister, principal of Glasgow University, is chairman. On this body there are represented the University of Glasgow, the education authorities of Glasgow, Ayrshire, Dumfriesshire, Lanarkshire and Renfrewshire, and the Workers' Educational Association (Scotland).

The committee is well pleased with the result of its first year's efforts. Everywhere throughout the area, classes for adults have increased, and the subjects taught are of the most varied kind. An interesting feature of the statistics is the classes held in the past season.

Town Barn Damaged By Fire

A fire that may have had serious consequences commenced in the town barn on Tuesday evening. It was fortunate that there was all kinds of assistance available and everybody speedily gathered to give what help they could. Chemical engine, extinguishers and water were used in subduing the flames and preventing them from spreading to adjacent buildings. However at that, it was practically two hours before the flames were extinguished. It was deemed advisable to take out the household furniture and belongings of Mr. and Mrs. Turner on to the street, the risk of the fire reaching the adjoining building at one time being very great.

The cause of the blaze is not known, but is believed to have been internal combustion of gas in the hay. With the hot weather we have been experiencing, with hay possibly on the green side, there is much being cut from stables, it is easily understandable how this would happen. Considering the length of time it took to put out the fire and the apparent hold it had on the building the amount of damage was not great.

Mrs. G. M. Miller and child, released from their vacation trap, this week.

Weather is still continuing to be of the torrid brand and there apparently is not much difference throughout the West. Wednesday, the mercury registered 98 in the shade. Dominion crop estimates are dwindling and have now reached, it is reported to two hundred and twenty-five millions.

Next in importance is natural and physical science, with economics and industrial history, and organization third. An outstanding feature of the work done under the Dumbarton Authority has been the wide demand for courses in Bible literature and study. Music is also a subject which is becoming popular as a branch study.

New English (and Scottish) language and literature take an easy first place in popularity. Next in importance is natural and physical science, with economics and industrial history, and organization third. An outstanding feature of the work done under the Dumbarton Authority has been the wide demand for courses in Bible literature and study. Music is also a subject which is becoming popular as a branch study.

Pool To Pay One Dollar

Calgary, Alta., July 23—One dollar a bushel will be the interim payment on wheat for grain delivered to the 1925-30 crop, according to an announcement made today at the Alberta Wheat Pool office. In last fall, when a bad slump in wheat prices occurred, the first payment was lowered from \$1.00 to 85 cents, but the previous interim payment will be issued this fall.

Some Facts About Breaking Brome Grass Sod

Brome grass has a strong creeping root-system and is somewhat difficult to eradicate, particularly in moist seasons or heavy soils.

For a number of years past three methods of breaking brome grass sod have been under test at the Dominion Experimental Farm, Indian Head, the Saskatchewan experiment of these methods when following the brome grass and oats follows the wheat.

In the first method the sod is ploughed early in the spring and summer-fallow through the year. The brome grass in the case merely received a set back, recovering to a great extent later.

In the second method a crop of hay was removed before the sod was ploughed, after which the plot was disked and worked as required. This treatment only partially destroyed the brome grass.

The third method was by far the most effective in getting rid of the grass. This was similar to the second except that the plot was buckstruck about the middle of September.

If the important consideration is to get rid of the grass the writer is of the opinion that two ploughings are necessary in the average year, the first being shallow, during a dry period of the summer and the second deeper, as late as possible in the fall. Much depends on the weather as a wet spell during the first ploughing may render the work useless. Dominion Experimental Farm, Indian Head, Saskatchewan.

Erecting Foundation

Work on the foundation of the new Catholic church is going ahead, cribbing for the cement work is ready, and cement work started.

A Camping Vacation

The school term ended, the roads in splendid condition, the morning with a contented purr, is a combination that just naturally leads the thoughts to a camping vacation. The people of Alberta are so fortunate in having many natural beauty spots a short ride from the door, that this form of holiday is becoming most popular every year. It is economical and it is healthy if certain precautions are taken.

Care should be taken to find out if all drinking water is pure. If this cannot be ascertained then the water should be boiled or chlorinated. The latter is a very simple proceeding, any druggist will supply the lime and give the few necessary instructions.

If there is a baby or a toddler in the party who must have milk, it is a wise proceeding to pasteurize it. No one can be sure if the milk bought has come from an infected animal.

Before diving into a likely looking hole for the morning splash be sure there are neither rocks nor roots. Do not bathe when very hot or immediately after a heavy meal. It would add to the safety of the party if at least one member could swim well. Carry a simple First Aid Kit.

Literature on First Aid can be obtained free from the Canadian Red Cross Society, 407 Civic Block, Edmonton, Alta.

Barn Destroyed By Fire

The Snowden barn, on the old Holmes place, was destroyed by fire, on Sunday.

Work Commences on C. P. R. Residence

Work on the C.P.R. residence of Roadmaster Beeswax was commenced today. The site is just south of the depot.

Empress Hotel To Be Wood-Sided

After much deliberation as to choice of material, the hotel company have finally decided to use wood siding as an outside finish for the hotel, and work to be commenced immediately.

Jim Ritchie returned on Wednesday from his holiday vacation.

John Barrymore in "Tempest" Coming to Empress, This Week

"Tempest" the John Barrymore screen masterpiece that New York acclaimed during a long run at \$1. prices, will bring America's most distinguished actor to the Empress Theatre, this week, in a romance of Russia's revolution, Camilla Horn and Louis Wolheim appearing in chief support of the star. The New York World thought "Tempest" the "finest, most genuine motion picture John Barrymore ever made" and "one of the most glowing film dramas which have come out of the west," while the New York Times called Barrymore's picture "a masterpiece... excellent entertainment."

John Barrymore appears in his first modern story in five years in "Tempest," for the action of the picture begins in 1914 and concludes in 1919.

The highlights of "Tempest": scenes of passionate fury between a prince of the blood and a peasant, between royalists and revolutionists, between generals and peddlers; and love scenes so convincing that The New York Telegram calls the picture "the answer to the modern movie maiden's prayers."

Bill Pawlak, and Allan Van Cleave, arrived home on Saturday, from Dundurn Sask., where they have been attending the C.O.T.C. camp.

Jess Gay was successful in getting the town team out of the barn when the alarm was first given of the fire, Tuesday.

Canada May Alter Tariff Structure To Meet Own Economic Needs

Tara, Ont.—If changes are made in the United States tariff which will be detrimental to the interests of Canada, alterations in the Canadian tariff structure to correct the situation will unquestionably be made.

This was the declaration of Hon. James Macdonald, minister of trade and commerce, during an address here, Canada, he said, had made and would make her own economic needs.

Mr. Macdonald's speech was designed to meet and answer certain statements and criticisms directed against the government's tariff policy by Hon. R. B. Bennett, Conservative leader, in the course of his Western Ontario tour.

At the outset he stated that Mr. Bennett was trying "to create fear in the minds of the people of Ontario that the government which has so successfully administered the affairs of Canada for the last eight years will not be able to meet a new situation which he fears has arisen."

"No situation has arisen during the past eight years that has not been met satisfactorily by the government," Mr. Macdonald said. "Nor do I believe the people of Canada fear that should a change be made in the American tariff policy detrimental to Canadian interests the government is not prepared to meet it."

The government of Canada is much more alive to the situation than is the leader of the opposition, and is fully prepared, in the interests of Canada, to revise its tariff policy from time to time to meet any changes that may take place in the tariff structure of the United States or of any country."

Referring to the demand of Mr. Bennett for an inter-empire trade conference, Mr. Macdonald stated that since Mr. Fielding introduced the British preference it had been Liberal policy to increase trade within the empire. How this had worked out was indicated by figures covering the past eight years.

"Our imports from British countries have increased from approximately \$150,000,000 to \$237,000,000, and our exports from \$347,000,000 to \$529,000,000, giving us an increase of trade within the empire during that period of almost \$200,000,000," the speaker said.

The minister of trade and commerce gave a brief summary indicating the volume and nature of Canada's trade with the United States. During the year 1928, he said, the Dominion had imported raw materials from the republic to the value of \$227,000,000 and exported to the United States raw materials valued at \$153,000,000.

He quoted figures in support of this statement: "The value of 600 worth of goods to the United States a year, and judging by past experience the value will not shrink materially, no matter what the tariff fixers at Washington may do," continued Mr. Macdonald, and he added in his opinion that the same articles of British manufacture, which, if known to the Canadian public, could be purchased by Cana-

dian consumers to better advantage than the commodities which are now bought from the U.S."

Bank Bandit Kills Officer

Hamilton Detective Is Victim Of Assassin's Bullet

Hamilton, Ont.—Detective Clark, an unknown name here, was dead as a result of a gun fight which followed the robbery of the east end branch of the Provincial Savings Bank here. The man who robbed the bank was followed and cornered by police in a house on Roslyn Avenue. He was armed with a revolver and after the occupants of the dwelling fled, fear gas bombs were brought and exploded in the cellar. When the police believed the bandit was overcome by the gas, a squad headed by detective Clark entered the house through the basement.

A shot from a saved off shot gun ended Clark's life. Detective Hleak, another member of the police squad, who moved behind Clark, pumped five shots into the gunman's body. He was killed instantly.

Canada's Forest Wealth

Will Take Inventory Of Forest Resources As Preliminary To Reforestation Plans

Ottawa.—Federal and provincial governments of the Dominion are co-operating for the purpose of taking an inventory of Canada's forest resources. Today, Hon. Charles Stewart, minister of the interior, opened a conference attended by three provincial ministers, as well as federal and provincial officials, which will endeavor to arrive at the actual forest wealth of Canada.

In his brief opening address, Mr. Stewart pointed out the importance of this step as a preliminary to reforestation plans.

Body Of Missing Pilot Found

Seaplane Crashes In St. Lawrence

Montreal.—The body of Colin S. "Jack" Caldwell, Vickers' test pilot, who has been missing since the seaplane crashed in the St. Lawrence river last Thursday, was recovered at Varennes, about 15 miles from the scene of the disaster.

The badly battered body was identified by the pilot's leather coat. A ten-year-old boy, son of A. Brunelle, Varennes butcher, found the body and probably will be awarded the \$500 offered for its recovery by the Canadian Vickers, Limited.

Scores Killed By Storm

Belgrade, Jugoslavia.—Press despatches from the Jugoslavia points tell of more than 100 persons killed in the last fortnight by violent recurring lightning storms. Thousands of cattle have been carried away by floods with immense damage to orchards and vineyards.

Rum Running Wanes

Significant Drop In The Export Of Liquor Is Reported

Windsor, Ont.—Canadian customs returns for the current month should show a significant drop in the exports of liquor from the Essex border docks, according to reports of the United States authorities.

Imports of the one-time notorious liquor receiving depot of Ecorse have been cut to a fraction, according to customs patrols, while the occasional rum boat on the American side of the Detroit river is more or less an oddity these nights, they say. Considerable liquor, however, is getting through below Ecorse on the Trenton front, guarded by the greyhounds of the "dry" navy, the United States coast-guard cutters. The rum boats are shooting out from Amherstburg into the lake and there are no government boats in adequate numbers to stem the tide.

But this situation is to be remedied, according to plans announced by the United States authorities, who are to be in service by July 1. It was reported, ranging in type from launches to the 70-foot speed boats, carrying one-pair guns and useful for long ranges.

Damage By Storm

Cannot Be Computed

Cost Of Semi-Tornado In Montreal District Will Run Into Millions

Montreal.—The full story of the electrical storm and semi-tornado which swept down from the north, spreading death and destruction in its path from the Laurentians to the eastern townships, remains to be written. The death toll stood at seven but news from the Laurentian district north of Montreal was only fragmentary owing to continued disorganization of communication lines. Total damage caused by the storm, which will never be completely computed, but it is extensive and probably runs into the millions. \$100,000 worth of damage alone having resulted when lightning set fire to the Sacred Heart convent at Saul au Ruisseau, here, and completely destroyed that widely known educational institution.

Crop Conditions Good

But Not Up To Last Year Says C.N. Official

Montreal.—Crop conditions throughout Western Canada, although excellent in certain districts, are not generally as promising as at this time last year, stated Dr. W. J. Black, director of colonization and agriculture of the Canadian National Railways, who has returned from an official tour of the west. Notwithstanding this, however, he said, conditions generally are more prosperous than for some years in Western cities, said Dr. Black.

There is a tremendous area under cultivation this year throughout the entire Peace River country and land settlement has been going forward there at an enormous rate. Settlers have even gone in large numbers as far northwest as the Port St. John district, they appear generally to be a bit of people.

Riel Veteran Dead

Winnipeg.—A participant in both Riel rebellions, George Buchanan, 82, who came to the West as a member of the Red River expedition under Sir Garnet Wolseley, is dead at his home here.

U.S. ENVOY TO BRITAIN

General Charles G. Dawes, new U.S. envoy to Great Britain, who discussed the question of naval disarmament with Premier Macdonald.

General Charles G. Dawes, new U.S. envoy to Great Britain, who discussed the question of naval disarmament with Premier Macdonald, arrived in London, England, Premier Ramsay MacDonald said. He had hoped before many days it would be possible to make definite announcement of how naval disarmament negotiations were to be conducted, where a conference would be held, and the precise objects of that conference.

He was speaking at a Labor reception held at the Friends' Meeting House, in Euston Road. At the same time he disclosed that he had had a second conversation with General Charles G. Dawes, new United States ambassador to Great Britain, and had seen Hugh S. Gibson, United States ambassador to Belgium, who arrived in London to assist General Dawes in finding a solution to what has been termed the out-standing English speaking people.

To Find Solution Of Naval Problem

Premier Macdonald Is Very Hopeful Of Ultimate Outcome

London, England.—Premier Ramsay MacDonald said today he hoped before many days it would be possible to make definite announcement of how naval disarmament negotiations were to be conducted, where a conference would be held, and the precise objects of that conference.

He was speaking at a Labor reception held at the Friends' Meeting House, in Euston Road. At the same time he disclosed that he had had a second conversation with General Charles G. Dawes, new United States ambassador to Great Britain, and had seen Hugh S. Gibson, United States ambassador to Belgium, who arrived in London to assist General Dawes in finding a solution to what has been termed the out-standing English speaking people.

Premier Macdonald, while very brief, was extremely hopeful. After he referred to the great political victory Labor had won and the general position of his government, remarking that there would be no miracles and no magic, but a sincere determination and courage to face public questions, he plunged immediately into his revelation.

"We have allowed Mr. Grass to grow under our feet. We have already started conversations with the United States."

"It is not a prophet, and am not going to pose as one able to prophesy. I am convinced of this, that the obstacles that have been in the way of an understanding have been created, if I may ring the changes on one English word, by a lack of understanding of each other. The great thing which is wanted in the world today is capacity of different people, different races and different nations, to put themselves in each other's shoes. That will be one of the things that we shall try to do in the conduct of these negotiations."

Population Decreases

London, England.—England and Wales have decreased in population by 44,132 persons in the first quarter of this year, when compared to an increase of 31,611 persons for the same period of 1928, is causing some alarm.

Air Mail Service For the West To Be Inaugurated This Fall

Stockmen Protest Against Land Sales

Grazing Leases Said To Be Unfair To Cattle Men

Swift Current.—As a result of the Saskatchewan Stock Growers' Association Convention, held in this city, the stockmen of the province are taking action in several matters of importance to the ranching industry.

The school lands grazing leases are anything but satisfactory to the cattle men, it being contended that government regulations regarding such leases have been changing so frequently that ranchers do not know where they stand in the matter from year to year, the latest action being the offering for sale of school lands used for grazing.

The Dominion Department of Agriculture is being asked to make a survey of the Dominion to ascertain the most suitable districts for winter feeding in the interest of the stock-raising industry.

Authors Meet In Halifax

Report Shows Canadian Association Has Over Eight Hundred Members

Halifax.—Papers dealing with the contribution made to the literature of Canada by British Columbia and the Maritime provinces feature a session of the ninth annual convention of the Canadian Authors' Association here. A paper written by A. M. Pound, of Vancouver, dealing with the work of authors resident in British Columbia, was read by Percy Gormer, novelist and banker of Vancouver, while Professor Archibald MacMechan, head of the English department at Dalhousie University, and vice-president for Nova Scotia of the Canadian Authors' Association, traced the literary movement in Nova Scotia from the early days of the 18th century.

The secretary's report showed a membership of 836 in 14 branches.

Wins Hungarian Derby

Horse Sold For Seventy Dollars Captures Covered Plates

Budapest, Hungary.—Condemned and sold for meat by a former owner for \$70 because he considered him "fit only for the plough," a three-year-old horse named Babano walked off with the Hungarian National Derby, a \$10,000 prize against a field of 21 of the country's thoroughbreds.

When Babano's old master consigned him to the farm he was bought by a local tavern-keeper, who found him too short to hitch to a cart. He turned him over to a friend, who, after a few months' training, prepared him to race again, the trainer claiming he was among the proudest places in the Hungarian turf.

Ottawa.—"Air mail services will be inaugurated shortly between Montreal and Detroit, and between Toronto and Buffalo, which will further advance local connections not only between this country and the United States, but with cities in western Ontario, such as Hamilton, London, and Windsor," declared Hon. P. J. Venn, postmaster-general, speaking over the radio from station CNDT, Ottawa, recently.

"The department hopes to inaugurate the prairie air mail connections between Winnipeg, Regina, Moose Jaw, and Calgary, and between Regina, Saskatoon, North Battleford and Edmonton, some time during the coming autumn. These services will afford a 24-hour saving in time in the movement of mails from terminus to terminus and will give corresponding advance to intermediate points," Mr. Venn said.

"The objective at which we are aiming is, of course, a trans-Canada route and the services so far decided upon are merely steps towards that objective. In the course of a few years, Canada's coast-to-coast air mail route may be in operation. This country occupies a strategic position which will enable the rapid movement of mails from Europe to the Far East to be made by air, from Belle Isle to Vancouver, in less time than by any other route."

"Aside from the benefits that are to be had by the Canadian people, this is an international aspect of the question is of the first importance. "Since the autumn of 1927, the post office department has carried on more than 116,858 pounds of mail by air—111,445 pounds of British and foreign mail, 105,783 pounds for remote frontier settlements, and 215,000 pounds of mining camps. The remaining weight of mail was carried on routes between Canada and the United States and between Canadian cities. This is not a small achievement, but it is slight in comparison with what I believe the future holds for the 18th century."

"Air mail is here to stay, Canada must not lag behind in the race, if her standing in aviation is to be maintained and her postal communications are to remain at the high standard which is a matter of just pride to the Canadian people."

Declares Stresemann Failure

German Foreign Minister Faced By Non-Confidence Vote

Berlin.—Dr. Gustav Stresemann, German Foreign Minister, in a vigorous reply to severe Nationalist criticism, told the Reichstag yesterday he would stand for the installation of a commission in the Rhineland as the price of its evacuation.

When debate was finished for the day the Nationalists introduced a motion of no confidence against the Foreign Minister, which was defeated by a vote of 149 to 145.

Sapiro Recommends One Hundred per Cent. Wheat Pool Control

Saskatoon.—"Your Pool needs one experiment of five years of pure co-operative marketing and I come with all sincerity to tell you that the next step is for a 100 per cent pool." These were the messages brought by Aaron Sapiro, co-operative marketing expert, who addressed a large audience here under the auspices of the United Farmers of Canada.

In his opening remarks Mr. Sapiro announced that his subject would be "100 Per Cent Pool Control." He told the gathering that he was not here under the auspices of the Wheat Pool but at the request of the U.F.C. "The fact the Wheat Pool board had gone on record in opposition to the 100 per cent pool was no reason at all in his mind why the question should be considered as a dead issue," he said. Although that was what he had been told, Mr. Sapiro arrived in Saskatchewan, the speaker declared.

"And the 100 per cent pool is far from dead," he emphasized, "regard-

less of who wants to put it under the ground."

At the outset, he contended that a 100 per cent pool was not only proper, but absolutely essential for true co-operation. It merely meant, he said, that the wheat grower, whether the farmer, or those who controlled two-thirds of the acreage wanted co-operative marketing, that all wheat grown in the province would be delivered to the pool for a period of years.

The legislation, which would be of a permissive nature, might be either provincial or Dominion. He was not concerned with the specific form of the law. The single question was whether the farmers wanted a purely co-operative system or wanted one that was spiced with speculative agents.

Grain dealers, Mr. Sapiro said, would naturally be opposed to the idea of a 100 per cent pool. Also those in hook to the grain dealers, but he could not understand why co-operative leaders should be opposed to the idea.

NEW C.N.R. HOTEL FOR VANCOUVER

The finest hotel on the Pacific coast is now under construction in the heart of Vancouver for the Canadian National Railways. The excavation for the foundations has been completed and the steel contract awarded and work will be pushed vigorously until the hotel is ready.

This fine building, which will occupy a prominent place in the downtown section of the city, will be known as The Canadian National Railways Hotel. It will contain five hundred bedrooms and will be wholly modern in all its facilities. The photograph shows the architect's conception of the new hotel as it will appear when completed.

Saskatchewan and Alberta To Share Alike In Resources Settlement

Ottawa.—The Dominion government is now prepared to accord to Alberta and Saskatchewan, in settlement of the natural resources question, "treatment similar to that granted to Manitoba with respect to the continuance of Dominion subsidies."

It was stated by the prime minister that the Dominion government having in mind negotiations now pending with the provinces of Alberta and Saskatchewan, and the representations of the governments of these provinces with respect to the continuance of the payment of subsidies in accordance with the terms of existing legislation, is now prepared to accord to Alberta and Saskatchewan the same treatment with respect to that granted to Manitoba with respect to the continuance of Dominion subsidies.

The report recommends that Manitoba should be paid the sum of \$48,084,212 in cash, and that the balance due for past arrears covering the period during which the resources have been alienated. It also recommends that from now on until the population of

Manitoba reaches 800,000, the province shall receive annually the sum of \$962,500. When the population reaches 800,000, the report proposes that this amount shall be decreased to \$750,000 per annum. Finally, when the population reaches 1,200,000, the amount payable annually will rise to \$1,125,000, and remain unchanged thereafter.

Subsidies must be paid from the treasury and the country generally must provide the cash. It has been repeatedly stated frequently that the eastern provinces of Canada consider themselves very important parties to any settlement which is made of the natural resources question. Treatment must be fair to both east and west.

The function of the commission was to ascertain what financial readjustment should be made for the purpose of placing Manitoba in a position of equality with the other provinces of Confederation in respect to the administration and control of its natural resources. The report is the commission's answer to this question.

Prairies Need Not Be Treeless

Conditions Which Destroyed Forests On Canadian Plains Have Changed

The prairies are not treeless and never have been. Trees have always been found near the lakes, rivers, and hills. The existence of trees near these natural fire-breeds is almost conclusive proof that prairie fires were of great importance in the recent past. This is one unfavorable influence that settlement has removed and from all appearance the most important one.

Trees will now grow naturally on land that has been open prairie for unknown lengths of years. Some great changes have taken place on the Canadian plains. That it is the weather is at least doubtful, for the weather is one of the few things that the white men cannot improve of change.

When a forester is asked to explain the treeless prairie he usually falls scientifically about light precipitation, cold winters and winds, and altitudes. Yet an enormous forested belt north of Lake Athabasca receives no more rain than the driest parts of the prairies. The cold winter temperatures and winds of Northern Siberia do not prevent forests from growing far north of the Canadian limits of tree growth. As for the altitudes, the true prairie region near Winnipeg has an elevation of only seven hundred feet.

It is true that the climate of the prairies makes reproduction uncertain and growth slow, yet it does not by any means preclude the possibility of forests. There are no extensive areas in Canada where the climate is so dry as to prevent trees from growing. In an area where the climate will allow trees to establish themselves and where no forests exist, there must be other more important factors at work. The changing appearance of the prairies indicates these unfavorable influences have been removed.

One hundred thousand shelterbelts and hundreds of naturally established young poplar bluffs prove that trees can and will grow on the prairies. The practical extinction of the buffalo and the disappearance of prairie fires seem to have upset the balance of forces which have kept the prairie free from trees in the past. It is this that will be one of the few instances where settlement has actually encouraged the establishment of new woodlands. Even if all attempts at tree-planting were to stop, it seems very probable that the unused lands of the prairies would in time become covered with extensive areas of poplar.

Oldest and Youngest

Ireland's Parliament a Thousand and Eighty's Eleven Years Old

The Parliament of Ireland, known as the "Athlone" is planning to celebrate its millenary one thousandth birthday. We are so accustomed, says "Looker-On" in the London Daily Chronicle, to thinking of our own as the Mother of Parliaments that to hear of a thousand-year-old national convocation is something of a humbling shock. In the other hand, there are some youngsters in Parliaments that have not yet attained their majority. Among them is that of Estonia, which the War was responsible for creating, and which is this week just eleven years old.

Barbers Take Notice

A Berlin physician has investigated stomach ailments and has found that unmarried people between the ages of 20 and 30 suffer more from dyspepsia than the married people of the same age. Unmarried folk, the physician finds, have the tendency to bolt their meals, causing indigestion. The married people take their time in eating.

He: If you refuse me I shall never love another.
She: Will that be true if I accept you?

"Drink again!"
"So and I!" Sandogianse-Strix, 36th

W. N. U. 1792

Builds Up Fine Business

American Woman Successful With Sheep Ranch in B.C.

A visitor to the sheep range of Mr. and Mrs. Robert Heron of Cherry Creek, near Kamloops says: "Mrs. Heron is an American-born woman full of vivacity, optimism and energy, and knows pretty nearly as much about the practical side of sheep ranching as her husband. This was her way of approaching the sheep question in British Columbia, an interesting combination of feminine indirectness, and that intuition which is currently believed to endow her sex with a sixth sense."

"I want some nice mutton chops," she said to the butcher at Penitence on a certain day four years ago.

"You will not find such a thing in town, madam," he said. "That is no country for sheep and for that matter not much else, either." She had been very uneasy in striking a bare position, and she had passed out in the ranks of mercantile endeavor in that progressive city by the lake. Yet, but that man was sure tearing down Canada. There was a new life, newly arrived from the States with exactly the opposite feeling. For one thing, I like the roads. For another, they have good bottoms, which meant something to people like us, who were contemplating driving our way from the way from Washington," she said.

"Less than four years ago, we drove our 2,500 sheep from Peterborough, Ontario, to Kamloops, across the Canadian border to Penitence, B.C. From there we shipped them by rail to Kamloops and drove them out to Cherry Creek. We reached Kamloops on October 11, 1925, in a snowstorm. The welcome we received was the exact opposite of the weather. Nothing could have been more cordial, warm or helpful. Everybody who was in any position to assist us to get settled was there with offers of service in that direction. Since then we have worked hard and have prospered from the start."

Live Stock Protection

Cattle Diseases Kept Out Of Canada By The Vigilance Of The Department Of Agriculture

Canada is fortunate in having escaped many of the diseases of live stock which in other lands have inflicted great losses and even rendered some countries quite comestible. In those diseases, quite common in other parts, that are created by live stock men, have never invaded Canadian herds. These diseases are cattle plague, contagious pleuro-pneumonia, and foot-and-mouth disease. Outbreaks of the last named of these occurring in the United States during the past decade or so, cost many millions of dollars and in measures taken for its eradication. These and other epidemic diseases are kept out of Canada through the vigilance of the Department of Agriculture, at Ottawa, in the administration of "The Animal Quarantine Act." This act permits the admission of live stock from outside countries only when accompanied by official certificates of health. In the case of cattle, sheep and horses, they are held under supervision and quarantine stations for a sufficient length of time to give assurance of their freedom from disease.

Care In Selection Of Children's Toys

Is One Of First Steps In Prevention Of Blindness

Greater care must be exercised by parents in the choice of children's toys. Capt. E. A. Baker, general secretary of the Canadian National Institute for the Blind, declared at an annual meeting of the council in Toronto.

"This is one of the first steps in the prevention of blindness," he said. "Sharp-pointed toys often are thoughtlessly presented by adults to small children and blindness results. Just a few months ago, a woman came to my office with a 5-year-old child who had lost an eye while playing with a bow and arrow. The physician had lost an eye while playing with another sharp-pointed toy."

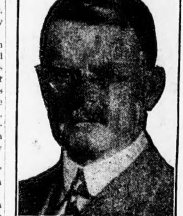

Products Of Our Coastal Fisheries
Fishhooks is a staple product of Canada's coastal fisheries. During the spring and summer it is split and salted but the important season comes with the autumn, when the fish are shipped fresh or else smoked and sold as finnan haddock.

In Norway a fish forbids anyone cutting down a tree unless he plants three saplings in its place.

"Why do you call it leap year?"
"You've got to keep on the jump."

Appointed Director

C. T. Jeffrey, President of the Soo Line, Minneapolis, who has been appointed a Director of the Canadian Colonization Association, subsidiary of the Department of Colonization and Development, Canadian Pacific Railway.

Developing Rust Resistant Wheats

Important Problem Is Receiving Attention Of Department Of Agriculture

The stem rust of wheat is responsible for enormous losses to farmers in the Prairie Provinces of Canada every year. A sum of no less than \$200,000,000 was estimated as the loss suffered through this cause in one of the worst years. This state of affairs is leading the plant breeders to endeavor to develop resistant varieties that possess the merits of the best wheat grown. The Department of Agriculture, through the Botanical and Cereal Divisions, has for years been working on this problem and is following a well defined line of work which is being carried on at the Rust Research Laboratory in the West and at the Central Farm at Ottawa.

Dustless Coal

Treatment For Making Cleaner and Healthier Coal Is Discovered

The advent of dustless coal both anthracite and bituminous was described to the 25th Canadian delegates as well as anthracite producers from the United States attending the 25th annual convention of Canadian Retail Coal Dealers Association, in Toronto.

J. W. Hackett, Petrolia, told the convention that a treatment for making "cleaner and healthier coal" had been discovered four years ago, but it was not until last January that a successful system of application had been perfected. The coal is made dustless by the application of a treatment of water mixed with variety of chemicals.

Puzzled By Order

An order from Vancouver, B.C., for a thousand live rabbits from New South Wales in order to establish a rabbit fur and skins industry in the Dominion has puzzled prominent New South Wales stockmen. The rabbits had proved a menace in Australia, they declared. "We only wish we were commissioned to ship a million of them," said one.

Remembered His Manners

Gamekeeper: "Now, then, didn't you say that board when you came trespassing in these woods?"

Tramp meekly: "Yes, sir."

Gamekeeper: "Well, what did it say?"

Tramp: "Dunno, sir! I was too pertite rest any more when I saw the first word was 'Private!'"

"FORE!" But There Were Five

These mule deer with the white patches on their plus fours were looking over the Banff Springs Hotel golf course when the warning cry of the golfer started them. Keeping your eye on the ball on this beautiful Banff course has its difficulty, seeing that some of the most lovely and stupendous scenery in all Canada is vouching your attention all the time while the golfer started them. Keeping your eye on the ball on this beautiful Banff course has its difficulty, seeing that some of the most lovely and stupendous scenery in all Canada is vouching your attention all the time while the golfer started them. Printer's Art Improving

Volumes In British Museum Show Work Done During Last Ten Years

Among the countless millions of books on the shelves of the library at the British Museum, are about 200 volumes considered the acme of the printer's art. They form an exhibition of books illustrating the most beautiful and expensive British work of the printer during the last ten years. Centuries-old Chinese manuscripts and illuminated books from the Monasteries of medieval Europe are exhibited in the same room as these masterpieces of post-war printing which has attracted the attention of printers whose names are famous among book collectors in the two hemispheres. Books from the leading presses of England, Scotland, the United States, France, Germany, Holland, Spain, Italy, Poland and Belgium are included in the collection. They have all been printed within the last ten years and experts are unanimous that the art of the printer has greatly improved since the opening of the twentieth century.

Held Job Fifty Years

New York Man, 89, Still Giving Valuable Service

Few men ever stay with one job fifty years, especially if they take it as a right.

That is the happy lot of George F. Baker, however, who became a trustee of the Mutual Life Insurance Co. of New York half a century ago and who still holds the position.

Though 89, he does not miss many things of the board, nor are his faculties so impaired that he cannot render valuable service.

It used to be believed that men could only live long by shunning responsibility and pursuing a narrow, self-centred existence.

If this age has proved nothing else it has proved the folly of such a theory.

John D. Rockefeller is 89, Clement K. Shuman is 82, Von Hindenburg, 82. They have all known the meaning of care and hard work.

Town Changes Name

Sumner, Nebraska Town Where the King Resided Is Now "Bogor"

Bogor, a seaside town in Sumner, has just obtained from the King permission to change its name to Bogor. As a result of the change, the town of Sumner, which was founded by the King's Majesty's long stay at Craigview House, just outside the town, while recovering from his serious illness of last winter.

A number of other towns throughout the kingdom also bear the affliction of some special connection with royalty at some time in their history.

Record Is Broken

All existing records for the monthly registration of new aircraft in Canada were broken during May, with the official listing of 32 additional private and commercial planes.

The fifty per cent. increase in flying activity was registered over the previous twelve months.

Employer: "I'm looking for a man with new ideas."
Applicant: "Believe me, I've got them. I was just married last week."

Mr. Hankes: "What makes Jones so valuable to his firm?"
Mr. Hankes: "He collects money if they haven't got from persons who cannot pay."

Early British Parliament

Had Women Members

Were Essential Part Of Assemblies In Middle Ages

Many people imagine that Lady Apsley was the first woman to sit in a British Parliament, but in the Middle Ages women were an essential part of the deliberative assemblies, says "Oversea" in the reign of Edward I, for example, the Abbess of Shaftesbury, Berking, St. Mary Winchester, and of Wilton, were summoned to Westminster while in the reign of Edward III, a number of women of high degree, including Mary, Countess of Norfolk, Anne, Countess of Ormonde, Anne Despensers, Countess of Pembroke and Matilda, Countess of Oxford, were members of the National Council and they seem to have made their presence felt just as potently as do the women members of the House of Commons today.

Ladies at one time during the eighteenth century had admission not only to the public galleries but actually to the sacred floor of the House itself, where they would sometimes sit by the side of members. The ultimate abandonment of this privilege in favor of absolute exclusion came about through a display of the ladies, having been given the ladies, a great debate in February, 1778, had drawn to the House an exceptionally large number of ladies. Not content with the galleries they trespassed upon some seats from which they were customarily excluded. As members themselves were not content with the galleries they trespassed upon some seats from which they were customarily excluded. As members themselves were not content with the galleries they trespassed upon some seats from which they were customarily excluded.

They were, however, so incensed by the ladies, having been given the ladies, a great debate in February, 1778, had drawn to the House an exceptionally large number of ladies. Started With Four Seeds

Edmonton Postman Had Long Crop Of Turkish Tobacco Last Year

Reports from the tobacco plantations of Essex County, Ont., that a group of six farmers were about to experiment with the Turkish variety in an effort to see whether it could be grown in Canada, bring to light the fact that it has been.

Not only has the Asiatic brand been brought to maturity in Canadian soil, but it has been successfully achieved in Edmonton, which, as such things go, is no great discovery in the Arctic, and a decidedly not usually associated with the development of Oriental luxuries.

Mark Baker, an Edmonton postman, has made a hobby of tobacco growing since shortly after the war and since 1926, has been producing Turkish plants on a gradually increasing scale till his annual crop has now reached the commercial stage.

During the war, Baker, originally an Armenian, but now a naturalized Canadian, served with the Royal Engineers and was sent to Salonika. While in that general district he saw the sight of tobacco fields brought back to mind the weeks he had spent in the trenches in northern Albania. He determined, when he returned to western Canada at the cessation of hostilities, to tackle the tobacco problem in northern Alberta, even though he knew he would be told that it was an impossibility in such a cold climate.

With the assistance of both Federal and Provincial officials from the departments of agriculture, he began his experiments in vacant lands within the city limits. They were watched with great interest, since the postman-planter was pioneering, and it was generally expected that his chances of success were slim.

But his tobacco grew rapidly, and when he experienced his first crop of local pipe-smokers. Since he knew in detail the methods of cultivating and curing the Turkish varieties, he tried to get results. This proved to be a long and involved process, but in 1928, through the assistance of the Alberta Government Trade Commissioner and the British Ambassador in Constantinople and after reams of official correspondence had passed back and forth, he procured four solitary seeds.

These he developed in a cold frame and cherished like diamonds. They grew rapidly, but by last summer he had sufficient seed to plant an acre. In July, all his tobacco was dug and he experienced his first crop of plants off at the ground they sprang up again and he harvested his expected crop. The speed with which the tobacco matured is leading him to experiment with the possibilities of two crops a year.

In the Northern Alberta-Turkish tobacco is now thoroughly acclimated and of fine flavor. Baker's total acreage of tobacco of all kinds was over eight acres in 1928. This year it is increasing it. Some of his last year's crop was sent to the Canadian National Exhibition at Toronto.

Martin Baker, however, continues his daily rounds as a letter-carrier and his tobacco plantations are growing rapidly, ready for a side-line and a spare-time hobby.

Giving Assistance
Chairman of the Meeting — "Frien": You are gathered here tonight for the presentation of the collection we have taken for the benefit of our worthy pastor, who is leaving us to take a church down south. We could not let him go without giving him a little memento."

Tot: "Mother, be sure to save the brass buttons if you give my old coat."
Mother: "Why, dear?"
Tot: "I'll need them when I'm a policeman."

She: "What kind of music do you like?"
"Chinese music, you seldom hear it in this country."

AT THE MUSEUM
"I believe we have got too early. The porter will ask you to dress." — Pages Gals, Victoria.

WORLD HAPPENINGS
BRIEFLY TOLD

Director Baerle of the Zepplin works has gone to Tokyo to prepare for the arrival of the Graf Zepplin there on its cruise across the world.

A participant in both left rebellions, George Buchanan, 82, who came to the West as a member of the Red River expedition, died at his home in Winnipeg.

England and Wales have decreased in population by 44,112 persons in the first quarter of this year which, when compared to an increase of 31,611 persons for the same period of 1928, is causing some alarm.

Hon. Mr. Justice Riddell, Toronto, was elected president of the Canadian Social Hygiene Council at the annual meeting in Montreal. Judge Emily Murphy, Edmonton, and Dr. H. E. Young, Victoria, B.C., were appointed vice-presidents.

The great appeal flying has for the university student resulted in the department of national defence receiving more applications for course at Camp Borden than it has facilities to accommodate. The new class will have forty students.

Prof. C. Macdonald, a native of Canada and professor of theology in Yale Divinity School, who would not promise to defend the United States against all enemies, was denied American citizenship by Federal Judge Warren.

Frank G. O'Donoghue, of Toronto, was elected president of the Canadian Pensioners' Association at the fourth annual meeting of the association there. A large increase in membership was reported from Ontario and British Columbia.

Arthur Thomas, 19-year-old band leader who held up the Grand Central branch of the Royal Bank of Canada at Vancouver, escaping with some four thousand dollars, was sentenced in police court today by Magistrate H. C. Shaw to five years in the penitentiary and ten lashes.

If the organized system of cattle rustling by truck is checked immediately, Saskatchewan ranchers and stockmen of the entire west will be great losers, according to delegates attending at the seventeenth annual convention of the Saskatchewan Stock Growers' Association, at Swift Current.

Plans To Canoe Down the Fraser

Young German Journalist To Commence Adventurous Trip

In the track of the canoe trip of the first white men to lay eyes on the Pacific coast a young German journalist is about to start an adventurous canoe journey down the Fraser and the Thompson Rivers to Vancouver. Arriving in Jasper from Edmonton where he took a preliminary canoe on the Saskatchewan River, Carl Scherwila, of Munich, will leave for Mount Robson. He will take the water at Blue River, returning to Jasper by train. Scherwila plans to explore the entire length of the Malheur Lake. The young adventurer, who has written a number of books on outdoor subjects, is also a lecturer of prominence in Germany both by radio and from the platform and has written and produced movie scenarios of river and lake travel. By movie and still photograph and by the written and the spoken word, he will carry Canada back to Europe. His canoe is a folding one weighing only 35 pounds and easily carried on a man's back and is modelled after the Eskimo kayaks.

Mexican Jumping Bean

The Mexican jumping bean does so because of a little worm inside which curls itself and lets the bean like a catapult, carrying it house along with it. The worm lives in the bean all the time, and if a hole is made in the shell, it fills it up again.

Insurance Agent—“Under this policy you can't commit suicide within one year.”

Prospective Victim—“I don't believe my wife would let me take it.”

Canadian Amateur
Golf Championship

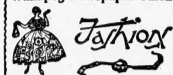

Entries Restricted To Players With Handicaps Of Ten and Close August 1

Entries for the Canadian Amateur Golf Championship to be played over the Jasper Park Golf Course, Jasper, Alberta, August 19 to 24, will close on August 1, according to announcement made by C. E. Harvey, president of the R.C.G.A. Positively no entries will be accepted after that date. Mr. Harvey said and it will be necessary for those desiring to play to have their entries in the hands of B. L. Anderson, secretary of the R.C.G.A., Hamilton, Ont., before August 1.

Players entering the Canadian championship must have a certified handicap of ten or less. Figuring on this basis, it is believed that about 100 players will tee off in the qualifying round of the major event at Jasper in August, the figures being arrived at as follows: Eastern Canada, 20; Manitoba, 15; Saskatchewan, 10; Alberta, 20; British Columbia, 20 and the United States, 15.

A much larger entry list is expected for the Western Canada Amateur Championship which will be played over the Jasper course at the same time. This event is open to players with a registered handicap of 16 or less. Entries for this event should be in the hands of Innes Mackenzie, Winnipeg, secretary of the Western Canada Golf Association, not later than August 14, though in special circumstances post entries will be accepted at Jasper.

Winnipeg Newspaper Union

Miss Margaret Bondfield has been given the position of Minister of Labor and the first woman to hold Cabinet rank in any British administration. She is also a member of the Privy Council.

Miss Bondfield is a former president of the Trades Union Congress and she was one of the prominent personalities at Washington when the International Labor Conference was held there.

A valuable report on child migration to Canada was produced by Miss Bondfield in 1924. She was parliamentary secretary of the department she now heads.

Once, when bidding farewell to a party of domestic going to Australia, Miss Bondfield told them the mistress of the house had a right to expect a "good, honest day's work."

The appointment to Cabinet rank of Miss Margaret Grace Bondfield is of particular interest to Canadians who remember her visit to Canada in January, 1927.

She was first elected to Parliament by Northampton, which she represented in 1923-24. She has served a thorough apprenticeship for her present Cabinet position, having been parliamentary secretary to the Ministry of Labor in the MacDonald Government in 1924. She was the successful parliamentary candidate in Walsingham in 1925.

Canada led all other countries of the world by a wide margin in the production and export of newspaper paper during 1928, according to the figures of the News Print Service Bureau. Dominion production in that year amounted to 2,381,000 tons, this representing one-third of the world's total output, while Canadian exports amounted to 2,207,000 tons, a volume equal to those of all other countries put together.

Weather maps can be transmitted to ships at sea with a new radio sending device invented by a Washington man.

Typically Sports

A new feature-wire tweed in smart wood-violet tones with neckline softened by fall silk crepe, revers collar with hatter's fold fill and vestee. The skirt shows the fashionable all-around box-plate and is stitched to hipoque which is joined to belt under the narrow belt. Style No. 482 can be had in sizes 16, 18, 20, 22, 24, 26, 28, 30 and 32 inches bust. It will make up very attractively too in plain silk crepe in vivid red, wood jersey in almond green with matching fall silk crepe, grey silk crepe with matching shade in linen, printed in pink and printed plaid in red and white tones with plain matching red linen. Pattern price 25 cents in stamps or coin (cash is preferred). Wrap cloth carefully.

We suggest that when you send for this pattern, you enclose 30 cents additional for a copy of our new book, "Fashion Magazine," filled with delightful styles, including new patterns, and cute designs for the kiddies.

The Captain—"I hear you arrested Buffalo Mike and then let him go."

The Patrolman—"That's not so. I had the wrong man. He showed me conclusively that he was not the Buffalo. He'd just come from Troy."

WHERE WHITE MEN LIVE

This little Red Cross Outpost at Pouce Coupe, in the Far North, is the pride of the Province of Alberta. Situated 189 miles north-west of Edmonton, it is 85 miles from the end of the road.

Formerly the buffalo and Indian held sway, but today the Pale faces are establishing themselves in splendid settlements, forging ahead with a type of civilization that does honour to the pioneer "Pilgrim Fathers" of their ancestry.

Thanks to the Red Cross vision and extension service, this district is no longer a place where Red men live, but where "White Men Live," for the beneficent arms of the Great Mother embraces six settlements in an area of three hundred miles.

Holds Important Office

Britain's First Woman Cabinet Minister Will Filled For Position

Miss Margaret Bondfield has been given the position of Minister of Labor and the first woman to hold Cabinet rank in any British administration. She is also a member of the Privy Council.

Miss Bondfield is a former president of the Trades Union Congress and she was one of the prominent personalities at Washington when the International Labor Conference was held there.

Song of Thanksgiving

The following song, "Gratitude," words by W. E. Dyer and tune suggested by Dr. E. C. MacMillan, is an inspiring song of thanksgiving for returning health of His Majesty the King.

WINCHESTER OLD C.M. 4-11.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad,
My heart is glad, my heart is glad.

Air Routes For Alberta

Three Are Likely To Be Established Very Shortly

Establishment of three main Alberta air routes by early next year, one leading east from Canmore to Montreal, one north from Edmonton to the Mackenzie River, and one south from either Calgary or Edmonton to Coult, on the International border, are the chief probable developments at Ottawa in the near future emphasized by H. B. Adhead, member for East Calgary, on his return to the city.

The matter of the air mail routes, Mr. Adhead stated, had taken up a considerable amount of time. The question of award of the contract for the East and West route, he said, was still undecided, but, he claimed, the amalgamation of three Western aviation companies into one concern, under the heading of the Great Western Airways, Limited, of Calgary, had simplified matters considerably, and had greatly increased the likelihood of a split in the main trunk line of the split. If it takes place," he said, "will make it necessary for one company to operate from the East to Regina, and for another company to operate from Regina to the West."

As soon as the matter of the mail routes is decided, he said, for as Canmore had been decided, he continued, the government would in all probability take up the establishment of routes North and South. These, he pointed out, would converge on Southern Alberta.

By spring, moreover, Mr. Adhead stated, it was very possible that everything would be ready for establishment of the final link in the Atlantic to Pacific air mail service, the route over the Rockies to Vancouver. Although a recent press notice had implied that this route would be completed by way of Jasper and Edmonton, by way of Jasper and Banff, Mr. Adhead stated emphatically that no decision on that score had been reached by the government. He stated that a survey by the Department of Civil Aviation would take place during the summer. A number of Alberta flying men, he mentioned, had stated to him that they favored the route from Calgary via Crow's Nest.

The Vimy Monument

Credited With Being the Finest of Any in the Battlefield Area

"The Vimy monument is the finest of any in the battle area," declared Hon. Herbert Marler, Canadian representative to Japan, upon his return to Canada from a European trip. Mr. Marler, who is sailing for Tokyo from Vancouver on August 29, about the "Empress of France," was in England and France on business matters and while over there was received by the Prince of Wales. The Prince, said Mr. Marler, showed himself to be well informed on the Canadian conditions, and asked a number of questions about the Dominion.

"After spending some little time in England, I went to France, and then saw the battlefields. Among the host of monuments that have been erected those of Canada are the Vimy and the Vimy monument is the finest of any in the battle area. On it are sculptured the names of 11,000 Canadians who fell at Vimy," he said.

In Waterton Lakes Park

Waterton lakes in Waterton Lakes national park, Alberta, were named by Leut. T. B. Blackburn, R.A., who visited the territory with the Palliser Expedition, sent out in 1857, to find a feasible route across the mountains. Leut. Blackburn visited these beautiful sheets of water on the way to explore the Kootenay Pass. He named them after Charles Waterton, the English naturalist and traveller.

The Smoother the Better

Two splinters of uncertain age were exchanging conditions. One said:

"My dear, which would you prefer in a husband, wealth, position or appearance?"

"Oh, appearance by all means, and I want him to appear pretty soon, too."

Quile Sue

Traveller: "You have a wonderful crop of peaches this year. What do you do with those you can't use?"

Hotel Manager: "The peaches we can't use we can."

Traveller: "We adopted the same principle with our orders. What we can't sell we cancel."

"The poor we have ever with us." "Yes, and aren't their flippers a nuisance?"

A platinum wire has been made by the Government of only one-thirtieth of an inch.

Rid Mexico
Of Drink Evil

President Portes Gil's campaign To Root Out Sale of Intoxicants

President Portes Gil's campaign to rid Mexico of the drink evil has gained such momentum that it has become one of the chief topics of discussion throughout the country and one of the principal subjects of legislation.

The president's appeal to state governments to second his endeavors has met with ready response in the form of orders restricting the sale of and consequently consumption of alcoholic liquors, as well as regulating the number of saloons.

Governor Raymundo Rodriguez, of Chiapas, has instructed the state treasury to establish so heavy a tax on intoxicating drinks that their manufacture will be unprofitable. This measure, in addition to discouraging manufacture of liquor, is calculated to oblige the saloons to charge prices beyond the reach of the average man.

Governor Enriquez also has ordered that the saloons be forced to pay increased taxes, hoping through this means to cause many of them to close. Furthermore, he has prohibited the sale of intoxicants on ranches and farms, many of which employ hundreds of peons.

Similar, although less stringent measures have been adopted in other states, and the war department has placed a ban on sale of liquor in dance halls and has notified cabaret proprietors that they will no longer be allowed to employ waitresses.

Anti-alcohol leagues have been formed throughout Mexico among mothers, teachers, school children and workers, and lectures on the evils of the drink habit are being given in theatres, the schools, union headquarters and other public assembly places.

Little Helps For This Week

"The Lord will give strength unto His people; the Lord will bless His people with peace."—Psalm xcix. 11.

Lo! fainter now lie across the shades of night.

And upward, shroud the trembling Suppliant we bend before the Lord of light.

And pray at early dawn,—

That His sweet charity may all our Forgiveness, and make our miseries to cease.

May grant us health, grant us the gift divine Of everlasting peace.

—Breviary (trans., by Edward Caswall.)

There is indeed a peace on earth; but it is not the peace of inaction, of prosperity. It is the peace of him who accepts the condition on which life is given, who gives himself for the conflict, who has a clear, strong faith that conflict is wisely ordered, and who has a certain in the energy it calls forth of the perfection of his soul and the triumph of a higher world.

Worth Trying

When salt harrains in shakers, remove the tops, turn them upside down, fill them with hot paraffine and place upside down on a smooth surface. Before the paraffine becomes too hard open the holes in the shakers top with a toothpick. Salt will keep quite dry in shakers when the covers are treated in this manner.

A woman in Russia has been pronounced dead in five occasions in the course of a few years. An ideal grandmother, we should say, for some office boy in the baronial mansion.

Petrels are no named because they are of water, on water, recalls the biblical story of Peter.

"My darling, if I had to choose between you and a million pounds, it would break my heart to have to choose the million."—Der Wahre Jakob, Berlin.

"The poor we have ever with us." "Yes, and aren't their flippers a nuisance?"

A Woman's Pride

The useful pride which makes a woman careful of her appearance, and the pleasure finds a help in the purity and delicate clinging fragrance of

BABY'S OWN SOAP

The Singing Fool

By HUBERT DAIL

Copyright, 1925, Warner Bros. Pictures, Inc.

SYNOPSIS

As gray dawn creeps over the New York skyscrapers, Marcus, the famous revue producer, is leaving the fashionable Plaza night club with a party of four. An actress companion suggests that they go to Blackie Joe's club, where the "fun is just starting," and Marcus consents. At Blackie's shabby little newcomers are seated at a "ring-side table" by Al Stone, Blackie's head singing waiter and comedian, who wonders who they are. Grace, a pretty cigarette girl, hopes the same "Marcus," and the actress helps Al, whom she admires tremendously.

CHAPTER II

As Al hurried toward the door leading to the bar, Grace speculated as to whether she could attract and intercept him. But he was moving too fast, and there were too many tables in between, so she decided to wait until he returned, then she would drop a word as to Marcus' identity. It was necessary for Al to know that, so he could put everything possible into the comic songs he would sing in a few moments.

Grace's sensitive young face was a study in devotion. Al Stone has been her best friend at Blackie's place. When she had taken the job of cigarette girl a few months before, the crooners, waiters, bartenders and performers frightened her, the rough-and-ready atmosphere of the place made her timidly draw into herself. Then it was that Al had put his hand kindly on her shoulder and looked down into her apprehensive brown eyes.

"Don't be scared, kid. Everybody's all right here."

Two minutes later, Al had forgotten the words, but Grace treasured them and knew them by heart. She had promptly fallen in love with him. Al did not know this, no one knew it, not even Grace herself. Al merely knew that the dark, gentle eyes of the young singing waiter had a quality she had never seen in the eyes of another man.

Now he was obscured for a moment as a chorus of dancing girls tripped across the floor. The chorus was agile, but that was all you could say. They were neither graceful nor beautiful.

Marcus, the producer, the consistent of femininity, the despot who picked only the loveliest girls for his revues and rehearsed them for three months until they were perfect—Marcus made no attempt to hide his disdain at this apology for entertainment. Grace saw him turn to the pretty actress at his table with a bored look that said only too plainly: "So this is what you brought me to see!"

Then Grace heard a voice behind her, a rough masculine voice.

"Hey, cigarette girl, come here."

The young waiter and carried her bustling tray of cigars and cigarettes to a nearby table. Three men, bleary-eyed and uncertain of speech, looked up into her face.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago, Canby, N.H.—"My little boy, who was two years old, had a severe attack of diarrhoea. The bowels were so active, and he vomited so much, I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved. I have used it for the other children, and my husband. It gives him a good, healthy, and when he goes away from home to work he always takes a bottle with him."

"Put up only by The T. Millar Co., Ltd., Toronto, Ont."

W. T. F. 1792

"Want some—cig—cigarettes," said one of them.

Grace lowered her tray for this patron to make a selection and, as she did so, became aware that one of his companions had drawn his chair closer to her.

"Say, you're a nice kid," suggested the second man, with a rapid expression on his face. "Do you know you're cute. I been watchin' you."

Grace smiled faintly, but ignored him otherwise, while she passed out the cigarettes to the first customer. That was what Blackie and Al had told her to do when the patrons became personal in their remarks—pay nothing and attend to business.

As she leaned across the table to hand another pack of cigarettes to the third man of the party her skirts rose a trifle. Without looking she knew that one of the customers was looking her up and down. Then suddenly she felt her other hand in his tightening grasp.

She straightened up sharply and tried to draw away. She knew she must make a scene, for, after all, she was only a night club cigarette girl, and the customers must be humored a little.

At this moment, Al Stone, just about to turn the corner to the door leading to the bar, shot a glance across the room and visualized Grace's predicament in a flash. In a moment he had veered across, while Grace gazed bewilderingly into the drunken man's eyes and murmured, "Please let go."

Then Al looked at her side and stepped back into the doorway. A cry of pain came from the man, and he released Grace to seize his white tie. The girl caught Al's signal and made good her escape, while the three unsteady Don Juans stared up in bewilderment at Al's quick grin.

"Why did you step on my foot?"

"Did I do that? I'm sorry."

Again the broad, but guileless grin of Al. Then he moved off, swiftly as he had come.

But now he felt a hand lightly on his sleeve and looked down into Grace's watchful eyes.

"Thank you, Al," she murmured. The waiter patted her on the shoulder. "That's all right, Grace. Those things will happen. If they bother you again let me know."

Al glanced down at the diminutive Grace and his handsome face softened. The little girl was so sweet, and he always did when he reassured her. But in the tenderness of her dark eyes he saw only the gratitude Al felt for her. To him the marked evidence of acceleration in her breathing and the faint tremor of her warm and lovely little mouth were only her reactions to fright. Nor did he see her head turn, as she moved away, while her eyes followed him adoringly.

Not until he disappeared and the throes of her heart seized back to normal did Grace recall that she had a message for him.

But when the singing waiter reappeared with four beers on a tray, she did not head straight across the bar room. Instead he paused in the bathroom entrance and glance down at her. Through an open door, he saw a good-looking blonde girl, a few years older than Grace, seated before a mirror in a tiny dressing room. She was studying her reflection in a self-satisfied way as she slowly and rhythmically brushed her lustrous golden hair.

This was Molly Winton, the hall-dancer at Blackie Joe's.

Al moved slowly toward the door as if drawn by a magnet, forgetting his order for a moment. His eyes lit up at the sight of Molly and with fascinated gaze he watched her white, rounded, raised arms protruding from her pink silk dressing gown as she slowly manipulated the hairbrush.

Molly was undoubtedly a pretty girl and one of the favorites at Blackie Joe's. Yet there was a something about her eyes and a peculiarly discernible at the corners of her mouth that boded no good for the man who would fall for her wiles with Al, however, was blind to these defects.

As he neared her dressing room door she saw him, gave him one of her different glances, then turned to the mirror again to rouge her shapely lips. At that moment of studying her reflection Molly, the heart-stopping beauty, was gazing at the person she loved best!

(To Be Continued.)

Swiss Plan Cross

The handling of the French monoplane "Yellow Bird" in Spain was said to be a total of 16 hours, of times the Atlantic Ocean, north and south, has been crossed by heavier-than-air machines. Drighles have made the crossing five times.

The world uses eight machines per day per inhabitant.

Old London Church

Sanctuary Made Famous By Chas. Dickens Is In Danger Of Crumbling

The church of St. George-the-Martyr, immortalized in "Little Nell" by Dickens, as "Little Dorrit's Church," is in danger of crumbling. All London knows St. George as "Little Dorrit's."

Ominous cracks many feet long have appeared in the walls and crypt. These are gradually widening until now the whole structure has been placed in danger.

The authorities have threatened to condemn the building unless prompt action is taken to make it safe. The rector of the church has started a drive for \$25,000 for repairs to save it.

"Little Dorrit's Church" was built in 1736, and was given its popular nickname because one of Dickens' characters often slept in the vestry with the church register as his pillow.

Upon the site of St. George-the-Martyr stood another church dating back to 1129 in the time of the Saxons. It is the earliest if not the oldest church in London.

Service For Plane Passengers

May Receive Market Reports and Aerial Programs Is Prediction

Aeroplane passengers of the future may expect to listen regularly to market reports, baseball scores, and musical programs, if the prediction of W. R. McCracken, Jr., of Cleveland, assistant secretary of commerce for aeronautics, comes true.

"These programs could be tuned in right now, for that matter," McCracken indicates. "In favorable weather the pilot of a properly equipped plane has no need of his radio apparatus."

McCracken predicts that great developments will be made in the use of radio transmission from ground to plane and from plane to ground.

DO NOT NEGLECT YOUR LITTLE ONES

At no time of life is delay or neglect more serious than at childhood. The filth of little ones quickly and unless the mother is prompt in administering treatment, a precious little life may be snuffed out almost before it has begun to realize the baby is ill. The prudent mother always keeps something in the medicine chest as a safeguard against the sudden illness of her little ones. Thousands of mothers have saved their babies through experience, that there is no more reliable remedy than Baby's Own Tablets and that is why they always keep a box of the Tablets on hand—why they always feel safe with the Tablets.

Baby's Own Tablets are a mild but thorough laxative which by regulating the bowels and stomach balances the system and relieves the baby of all colds and simple fever and promotes their health. Baby's Own Tablets have been used by a month old and have found that they react the best and do more good than any other medicine. Baby's Own Tablets are sold by druggists or by mail at 25 cents a box as outlined by Dr. Williams' Medicine Co., Brockville, Ont.

Why Shouldn't It Be

Abe Lyman, the Hollywood jazz bandman, who is playing at the Kit Kat Club in London, England, recently journeyed up to Scotland for the week-end. Returning from Glasgow to London, Lyman had as a travelling companion in his compartment a rather close-mouthed, middle-aged Scotchman. After an interminable number of stops at various stations, he found he had been looking more dour and solemn than ever.

"It's a long, wearisome journey," Lyman said to him, by way of making conversation.

The Scotchman looked at him with an angry frown.

"So it ought to be," he replied frostily. "It cost fifty-nine shillings, pence!"

Whether the corn he of old or new growth, it must yield to Halloway's Corn Remover.

Evening Up Balance

United States is growing fat on the manufacture of Canada's raw material. Since United States does not accept a reciprocity of trade, Canada will have to retain some of that fat within her own boundaries by placing embargoes on those raw materials that will enforce their manufacture within the Dominion, and by exacting a reciprocity of tariff that will even up the trade balance between the two.

Small But Efficient

A small electrical instrument, four inches across and not seven inches high, will, it is claimed, detect an escape of only 14 per cent. of gas in any tunnel or inspection chamber. When the escape occurs this instrument warns the nearest telephone exchange.

Simard's Liniment for Neuralgia.

Why go to Peru?

When crude oil is so plentifully available here in North America, why does Imperial Oil Limited go 4000 miles to Peru for the crude from which Marvelube is made?

It is because Peruvian crude has lubrication properties which make it particularly desirable as a base for a superior motor oil.

That is why Marvelube is giving aircraft operators longer periods between engine overhauls and a greater margin of safety.

Marvelube meets the needs of the modern high-speed motor, in the air or on the road, because its carbon-free and heat-resisting super-properties are created by Nature herself.

Let Marvelube give you the benefits of better lubrication. There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. See the Marvelube Chart at Imperial Oil dealers and service stations.

Marvelube

From far Peru comes a better crude to make a better motor oil

To Capture Cup

Sir Thomas Lipton To Make Another Effort To Win International Honors

"I'm going to do my damndest to bring the cup back," Sir Thomas Lipton said in the first interview he has granted since acceptance of his challenge to another international yacht race in 1930.

On the veranda of his mansion at Southgate, Sir Thomas appeared vigorous and healthy, despite the fact that he will be celebrating his 80th birthday at the time when the yachts are racing off Newport a year from next September.

"Do I think I can win the cup this time?" repeated the veteran sportsman, pondering for a moment. "Well, I am going to do my damndest. I hope and trust we will have good luck. To bring back the cup would be one of the greatest pleasures of my life."

Col. Duncan, Sir Thomas' racing manager, said that the Shamrock V, the challenging yacht, would not be a freak boat, and expressed the opinion that the rules for the 1930 race as outlined by Dr. Williams' Medicine Co., Brockville, Ont.

For Both House and Stable

There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

Cowgirl Outfit For Jeriza

California Man Says Opera Star Did Not Look The Part

The star of the Vienna Opera, Mme. Jeriza, received the other day a large parcel from California which revealed when opened a cowgirl's outfit, complete with saddle and bridle. The sender, a Mr. Schweppes, of Anaheim, California, accompanied the letter that he is making this gift to Mme. Jeriza because, when on a visit to Vienna, he saw the opera "The Girl of the Golden West" and was much pleased to find that Mme. Jeriza, a leading lady, had not the slightest idea what a "girl of the Golden West" really looks like.

Bicycle Boats Are Latest

Have Become More Popular Than Swimming Channel

Bicycle-boating across the Channel has replaced swimming in popularity.

Three athletes have already succeeded in crossing, so far this year. The latest was a woman, Miss Almes Franner, who pedaled her way over on a nautical bicycle in 9 hrs. 19 mins. She was so worn by the effort that she fainted as she got off her seat.

The bicycles are fitted to two long-pointed pontoons and the pedals are attached to paddles. Properly fitted, the sea-bikes make about five miles an hour, but currents bother Channel biffers.

"My daughter is about to be married and I want to get her a nice gift," said a prosperous-looking man who entered a house furnishing store, adding: "Let me see your newest grades!"

Farmer's Average Income

Cash Income Per Farm In Prairie Provinces Shows Increase For Last Year

The average cash income per farm home in the Provinces of Manitoba, Saskatchewan, and Alberta last year was \$2,544, exclusive of the value of stock, feed, meat, vegetables and other commodities produced and retained by the farmer for his own requirements, according to the No. 1 West Farmer. This is an increase of \$75 per home over the previous year.

Many mothers have reason to bless "Mother Graves' Worm Terminator," because it has relieved the little ones of suffering and made them healthy.

Wife: "Can you let me have a little money?"

Hubby: "Sure, as little as you like!"

Maggies build large strong nests which they use for several years.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.

—under a covering of Penn-Sani Heavy Wax Paper. You'll be amazed at the length of time they'll stay fresh, delicious!

Golf

Golf is a form of work made
expensive enough for a man to
enjoy it.

Golf is a matter of carrying,
ditch digging and carpets beat-
ing would be if those three
tasks had to be performed on
one hot afternoon in short
pants and colored socks by
gouty-looking gentlemen who
require a different implement
for every mood.

The game is played on care-
fully selected grass with little
balls and as many clubs as the
player can afford. These little
balls cost from 75c. to \$25, and

Domestic Animals Act, Stuays

On the premises of Herbert Brooks,
West Half of Section 10, Township 21,
Range 2, West of the 10th Meridian:
One bay Colt, white strip in face, left
hind white stocking, right hind foot all
white, no brand, about two years old.

It is possible to support a fam-
ily of ten people (all adults)
for five months on the money

A golf course has eighteen
holes, seventeen of which are
unnecessary and put in to make
the game harder. A "hole" is a
tin cup in the centre of a
"green." A "green" is a small
parcel of grass costing \$1.98 a
blade and usually located be-
tween a brook and a couple of
apple trees, or a lot of "unfin-
ished excavation."

The idea is to get the ball in
to each of the eighteen cups in

the fewest number of strokes
and the greatest number of
words

The ball must not be thrown,
pushed or carried. It must be
propelled by about \$300 worth
of curious looking implements
especially designed to provoke
the owner.

After each hole has been com-
pleted, the golfer counts his
strokes. Then he subtracts
six and says, "Made that in five."
That's one above par. Let's
play for fifty cents next hole,
too, Ed.

After the final or eighteenth
hole, the golfer adds up his

score and stops when he has
reached eighty.

He then has a swim, a pint of

gin, sings "Sweet Adeline" with
six or eight other lads, and calls
it the end of a perfect day.

Largest Passenger Engine in British Empire

When the largest passenger lo-
comotive in the British Empire
emerged from Angus Shops under
her own steam, close to eight
thousand employees, most of
whom had contributed something
to her creation, stopped to cheer
as her throttle gently opened for
the first time, she moved slowly
forward. She is a triumph of
Canadian design and engineering
craftsmanship; a graceful machi-
nery nearly one hundred feet
long, with a tractive effort of
60,000 pounds, equal to 2,675 hor-
sepower.

The new K-1-A Class locomotive
has been built from designs
originated in the motor power
department of the Canadian Pac-
ific Railway in the Angus Shops
by its own employees. Two of
these engines have been com-
pleted and are now being
operated on the district's main
line.

Although its weight, 134,000
pounds, is greater than that of
any other passenger engine in
Canada, the extensive use of Cana-
dian nickel steel parts has re-
duced it to a minimum, and the
high ratio of tractive power to
weight is a notable feature of the
new engine. Other features are
a one-piece cast-steel locomotive
body, a frame with a water-tight
underframe, boiler pressure
of 225 pounds, the heaviest of any
locomotive in Canada, and a
boiler of steel and tender of 97
feet 2 inches. There are eight
pairs of wheels, a four-wheel
leading truck, eight drivers, and a
four-wheel trailing truck. The
boiler has a diameter of 72
inches and the cast-steel boiler
cylinders are 22 1/2 inches by 30
inches. The coal capacity is 19 1/2
tons, and water capacity 12,000
gallons. A revolution of boiler
circumference lightens the driver of
this fireman.

The new design aimed at large-
ly increased power, reduction of
weight and elimination of parts.
The result has shown that Cana-
dian technical skill and workman-
ship is equal to the task of put-
ting a fully equipped engine of
the best type under its own power,
and that the Canadian Pacific
Angus shops, the second largest
on the continent, are capable of
using successfully with recogni-
zed engine-building plants ap-
where in the world.

Crop Cutting Problems

Why not profit this year from the advantage of harvest-
ing with a
